

Company Profile

Here a few infos and facts about Gotham Audio Organisation:

Gotham Swiss Audio organisation, history and background of 63+ years in the industry:

Gotham AG was founded **1983** in Switzerland as a subsidiary of **Gotham Audio Corporation NY USA (established in June 1958)**. Gotham AG was first meant to act as European headquarter for the Gotham Export organisation, mainly acting as sales and marketing office in Europe for Gotham Export products like **Lexicon, Urei, Valley** and many **pro audio products**. In Summer 1985, Franz Ammann and his wife Manuela grew independent from the US operation and started to develop the Swiss domestic business as distributor for Pro Audio products, Broadcast- MI- and Hi-Fi Products. The sales rights for **Gotham Audio Cables**, manufactured in Europe, were transferred from the US operation to Gotham AG office as well (1985). Gotham USA ceased activities in early 90ies and since then Gotham Audio is globally run out of Switzerland headquarters.

Current Swiss domestic activities of Gotham AG Dietikon: We handle most of the listed trademarks as exclusive distributors with all obligations (stock, service, support) and all rights (exclusivity). We sell all products in all possible markets, where products may fit, whilst priorities are in broadcast, pro audio and MI, but considerable activities are done in Hi-Fi (High-end), PA, home-theatres, cinema installations, conference technique, and Industrial areas (Connectors and Cables). Basically, we serve all markets where our audio products do fit and audio is applied. We sell most of our products through dealers and installers and do not bid in tenders directly unless only Gotham distributed products are requested. We do not supply any products that are not part of our product range and refer such inquiries to the direct sources such as fellow domestic distributors. We do run a shop and a direct sales office. 2 demo rooms with studio equipment and fully functional home theatre are available for product demonstration. Further a fully equipped service lab with 2 service technicians is supporting the clients for technical questions, application and of course repair service. We are also offering in house made cable assemblies using our own wire and distributed connectors. Many Hi-Fi enthusiasts like our **Swiss made assembled cable put together in our own lab in Dietikon**.

As of April 2021, Gotham Swiss local sales represents following manufacturers and brands:

Amphenol (Audio)	Angry Audio	APS Speakers
AXIWI intercom	Ehrlund Microphones	Ehrlund Pickups
Gotham Cables	Gotham Connectors	Gotham Microphones
I-Pin laser rulers	Lexicon (HiFi)	Pliant Intercom
Sonifex	Sound Plus	Studiohub+
Switchcraft	Zylia Microphones	

Effective January 2010 we have opened a 400m2 **fleamarket** sales warehouse with many vintage products also from other manufacturers. People can visit this stock and grab / find vintage products for direct sale. Some of these vintage items are also offered on auction platforms like eBay.

Consult our web page for additional information about our domestic activities: www.gotham.swiss

Gotham Cables manufacturer: We manage the worldwide sales and marketing of Gotham Audio Cables also from Dietikon offices. **Gotham Cables** runs a worldwide distributor network for the exclusive sales of Gotham Cables. We are shipping cable products from the logistics centres in Germany and Switzerland. Gotham is also filed with a German/ EU-VAT number and set-up, since the exported products are all of European origin. **Gotham Cables** are manufactured in a respected production plant in **Istanbul Turkey** for 25+ consecutive years and cable production quality is fully controlled by the Gotham Organisation. Visit www.gothamcable.com for full cable information.

Gotham AG in Switzerland is 100% owned by the Ammann family and is trading on self-financed capital. (no 3. party finances involved). Gotham Audio runs offices in Dietikon (2 location), Uitikon (Demo-Room). Gotham warehouses are located in Dietikon Switzerland, Freiburg (Germany) c/o Streck Transport, and in Istanbul factory for cables (Turkey).
